## Papageno Birding

We are ecologists with experience in developing research and conservation projects.

Our deep knowledge in avian biology guarantees an absolute respect and well-being of the birds we observe during our birding adventures, which are always experiences full of ecological content.

## Birding trips

On our tours you will find all kinds of habitats ranging from steppe-lands, mediterranean forests, open woodlands and scrub, dense coniferous and deciduous forests to high alpine areas up to 2592 m.a.s.l. the highest point of the Iberian Central Range. All these different biomes make it one of the areas in Spain with the greatest diversity of birds including Iberian endemisms as the Iberian Azure-winged Magpie and the Spanish Imperial Eagle, plus a wide range of other raptors. Moreover, reservoirs and other waterbodies at lower areas support a great variety of birds, especially waterfowl in winter and waders on passage.

## Nabia Hotel

**Nabia** is a small hotel in a unique location at the southern slope of **Sierra de Gredos**. Located on top of a hill, it offers astonishing views of both the mountains and **Tietar valley**.

A boutique hotel that allows you to enjoy the beauty of the surrounding nature with the confort of a **luxury hotel**. We have a serious concern about the environment and nature in the management of the hotel and in our restaurant service.
